Gudivada A.P., 521329 | [Leetcode](#) | [HackerRank](#) | [CodeChef](#) | [Portfolio](#) | [Github](#)

PROFILE

Artificial Intelligence and Machine Learning undergraduate with experience building AI-powered applications and full-stack systems using Python, React, and Node.js. Skilled in machine learning, NLP, and data-driven problem solving with hands-on experience developing predictive models, interactive dashboards, and RAG-based applications. Passionate about building scalable intelligent systems that solve real-world problems.

TECHNICAL SKILLS

Programming Languages: Python, Java

Machine Learning & AI: Scikit-learn, NLP, TF-IDF, Regression, Classification, LSTM,

Generative AI: RAG, LLM Applications

Web Development: HTML5, CSS3, JavaScript, React, Streamlit

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Firebase, Android Studio

Core Concepts: Data Structures & Algorithms, OOP, DBMS

PROJECTS

• Multi AI Models Web Application | [Live Demo](#) | [GitHub](#)

Built a Streamlit dashboard integrating three ML models for spam detection, digit classification, and house price prediction, improving model accessibility through an interactive interface.

Technologies: Python, Streamlit, Scikit-learn, NumPy

• Portfolio Website | [Live Demo](#) | [GitHub](#)

Designed and developed a personal portfolio website to showcase projects, skills, and achievements with responsive design and GitHub integration.

Technologies: HTML, CSS, JavaScript, React

• Fake News Detection using Machine Learning

Built a text classification system using TF-IDF and machine learning models to identify fake news articles and improve classification accuracy through optimized preprocessing.

Technologies: Python, NLP, Scikit-learn

• Stock Market Future Prediction | [GitHub](#)

Developed a GUI-based stock price prediction system using LSTM neural networks and integrated Yahoo Finance API for real-time stock data analysis and visualization.

Technologies: Python, TensorFlow, Tkinter

• AI Chatbot using RAG and LLMs

Developed an AI-powered chatbot capable of answering user queries using Retrieval-Augmented Generation (RAG). Implemented document retrieval and contextual response generation to improve answer accuracy. Built an interactive interface to process user queries and generate intelligent responses.

Technologies: Python, LLM APIs, RAG, NLP, Streamlit

SOFT SKILLS

- Problem-Solving
- Adaptability
- Communication
- Teamwork

EDUCATION

• B.Tech – Artificial Intelligence and Machine Learning

Vasireddy Venkatadri Institute of Technology, Guntur

2024 – Present | CGPA: 8.2

• Diploma – Electrical and Electronics Engineering

A.A.N.M & V.V.R.S.R Polytechnic, Gudlavalleru

2021 – 2024 | 93.2%

• Secondary School Education

Z.P.H.S, MallaparajuGudem, Krishna

2020 – 2021 | 98%

HOBBIES

- DSA Problems Solving
- Working on Web Development and AI Projects
- Learning new Technologies
- Building RAG Models

ACHIEVEMENTS

- Created a personal portfolio website to showcase projects.
- Developed LSTM-based stock prediction model.
- Active coding practice on LeetCode and CodeChef.
- Developed a multi-model AI dashboard using Streamlit.
